

Interviews

1. Tell me about yourself
2. Explain your current role at HisanLabs
3. Why did you move from Backend to DevOps?
4. What DevOps tools have you used hands-on?
5. What is your daily work as a DevOps Intern?
6. What is EC2 and why do we use it?
7. What is a Security Group?
8. Difference between public and private subnet
9. What is VPC?
10. What is IAM and why is it important?
11. ALB vs NLB
12. What is Auto Scaling?
13. How do you deploy an application on AWS?
14. App not accessible from browser – how will you troubleshoot?
15. EC2 running but app slow – what will you check?
16. How do you check CPU and memory usage?
17. How do you check disk space?
18. Where are logs stored in Linux?
19. What is a process and how do you kill it?
20. What is cron and where have you used it?
21. App stopped after reboot – why?
22. What is CI/CD?
23. Explain your Jenkins pipeline
24. What happens when a Jenkins build fails?
25. Pipeline works on main but fails on feature branch – why?
26. How do you store secrets in Jenkins?
27. How do you rollback a failed deployment?

28. What is Docker?
29. Docker vs Virtual Machine
30. What is a Dockerfile?
31. What is Docker Compose?
32. Container running but app not accessible – how to debug?
33. How do you reduce Docker image size?
34. What is Kubernetes?
35. Pod vs Deployment
36. What is a Service?
37. What is ConfigMap and Secret?
38. CrashLoopBackOff – how to fix?
39. ConfigMap updated but not reflected – why?
40. Pods down in production – what will you do?
41. What is Infrastructure as Code?
42. What is Terraform state file?
43. Variables.tf and outputs.tf
44. Terraform apply failed – what will you do?
45. Terraform vs CloudFormation
46. What do you monitor on servers?
47. Monitoring vs Logging
48. What is RCA?
49. CPU alert at midnight – what will you do?
50. Production is down – explain your steps
51. MongoDB vs PostgreSQL
52. App cannot connect to DB – how to troubleshoot?
53. How do you take DB backups?
54. Design a simple web application on AWS
55. How will you make it scalable?
56. How will you make it secure?
57. What does DevOps mean to you?
58. Fix fast vs root cause – which is more important?
59. Why monitoring is important?
60. How do you reduce downtime?
61. What are your strengths?
62. What is your weakness?
63. Why should we hire you?
64. Why do you want to join our company?

- 65. Salary expectations
- 66. Where do you see yourself in 2–3 years?
- 67. What will you do in your first week?
